Subject: FW: ACTION: INFORMATION NEEDED. Re: REQUEST: Visit w/ RA and R8 Staff

Hello Lu,

This is what I had sent to Kelly Collins earlier:

The Groundwater Technical Support Center (GWTSC) has provided support to R8. At the Hill AFB in Utah, GWTSC provided review of documents related to Monitored Natural Attenuation (MNA) of TCE and MTBE. Support was provided to R8 staff including Sandra Bourgeois (PM) and Maple Barnard (RPM). Work requested from the GWTSC has been completed, however, the cleanup is not completed and it is anticipated that additional support will be requested.

Note for Cindy – Technical support requests from R8 have been minimal over the last few years.

In addition to the technical support we also have conducted research projects and more thorough site investigations through the Region. Both the ASARCO/East Helena project (PRB for inorganic contaminants) and the Pavillion project began as technical assistance efforts in support of the Region. Both are still active. We also had a long-term research project at the Denver Federal Center studying the life of another PRB (GWERD work on this site has been completed).

Thanks,

Kelly Smith

Thank you all. I am also adding in Teresa, Subhas and Herb.

This need not be detailed. Feel free to send existing information or materials.

Gary and Al, please be sure to include any activities ongoing or recently completed in R8 through your Technical Support Centers.

If you have no activities with R8 to report, please respond indicating so.

Thanks again,
Cindy

Subject: REQUEST: Visit w/ RA and R8 Staff

All,

Cindy will be traveling to visit R8 next week. If your division or staff have any current projects with R8, please *reply with a short description of the work and who it is involves*. This will allow Cindy to go informed.

Please send your short descriptions by Noon tomorrow, 3/15/13.

Thank you,

Kelly Collins
